ABOUT ME

DevOps Engineer with commercial experience in cloud infrastructure, Kubernetes, Infrastructure as Code and CI/CD, primarily within Microsoft Azure environments. Hands-on experience with Azure Kubernetes Service (AKS), Terraform, GitOps with FluxCD, GitHub Actions and cloud-native observability using OpenTelemetry, Prometheus and Grafana. Experienced in Linux, containerization, networking, PostgreSQL and troubleshooting cloud environments. Currently working across client projects and expanding practical experience with AWS and multi-cloud infrastructure.

EXPERIENCE

DevOps Engineer

CloudForge

Nov 2025 – Present

- Working as a DevOps Engineer across client projects, supporting cloud infrastructure, deployment processes and application environments.
- Working with **Microsoft Azure and AWS** environments, including infrastructure configuration, troubleshooting and deployment-related tasks.
- Using **Infrastructure as Code** and automation tools to manage and maintain cloud environments.
- Supporting **CI/CD pipelines** and investigating deployment and infrastructure issues across client environments.
- Collaborating with developers, DevOps engineers and client-side technical teams to troubleshoot issues and deliver infrastructure changes.
- Working with cloud networking, access management, application configuration and environment-specific infrastructure.

Tech: Azure, AWS, Terraform, Terragrunt, GitHub Actions, CI/CD, Linux, Git

DevOps Engineer

Procter & Gamble

Jan 2026 – Jul 2026 (Client project via CloudForge)

- Managed and developed **Azure Kubernetes Service (AKS)** environments across DEV and PROD using Kubernetes and GitOps practices.
- Provisioned and maintained cloud infrastructure using **Terraform** and Infrastructure as Code practices.
- Managed Kubernetes deployments and infrastructure configuration through **FluxCD-based GitOps workflows**.
- Worked with Kubernetes networking using **Cilium**, including Gateway configuration and troubleshooting network connectivity.
- Managed application secrets using **External Secrets** and cloud-native secret management mechanisms.
- Supported **PostgreSQL** migration and configuration activities across cloud environments.
- Implemented and maintained observability using **OpenTelemetry Collector, Prometheus and Grafana**, supporting monitoring and troubleshooting of applications and infrastructure.
- Collaborated with developers and other engineers to diagnose infrastructure, deployment and application issues across cloud environments.

Tech: Azure, AKS, Kubernetes, Terraform, FluxCD, GitOps, Docker, Cilium, External Secrets, PostgreSQL, OpenTelemetry, Prometheus, Grafana, Linux

DevOps Engineer

FitWise

Oct 2024 – Nov 2025

- Deployed and maintained a web application and supporting services in **Microsoft Azure**.
- Designed and maintained **CI/CD workflows using GitHub Actions**, automating application build and deployment processes.
- Configured application and service access across Azure environments, supporting secure communication between components.
- Managed identities and access using **Microsoft Entra ID**, including user access and authentication configuration.
- Configured **Multi-Factor Authentication (MFA)** to improve security of user and administrative access.
- Supported cloud environment configuration and **troubleshooting** across development and production workloads.
- Collaborated with developers to troubleshoot deployment, application configuration and cloud infrastructure issues.

Tech: Microsoft Azure, Entra ID, MFA, GitHub Actions, CI/CD, Docker, PostgreSQL, Git

UX/UI Designer

Gomez

Jun 2024 – Nov 2024

- **Led and coordinated the UX/UI team**, supporting designers and overseeing day-to-day design work and project delivery.
- Worked closely with business stakeholders to understand business needs and turn them into product requirements and solutions.
- Collaborated with development teams during implementation, acting as a bridge between **business, design and technology**.
- Coordinated priorities, requirements and communication across stakeholders in an Agile environment.

UX/UI Designer / Full Stack Developer

Hido

Jan 2024 – Jun 2024

- Worked across product, business and development responsibilities in an early-stage technology company.
- Collaborated on web application development and integration of business requirements into technical solutions.
- Participated in application configuration, deployment-related activities and technical decision-making.
- Worked directly with business requirements, balancing technical constraints with product objectives.

UX/UI Designer

Trusted Software Services (TSS)

Mar 2022 – Nov 2023

- Worked directly with clients and development teams to analyze complex business requirements and translate them into implementable solutions.
- Collaborated closely with frontend and backend developers throughout software delivery.
- Participated in regular client meetings, presenting solutions, gathering requirements and coordinating implementation decisions.
- Created and maintained project documentation supporting communication between business and technical teams.
- Worked within an Agile/Scrum environment on complex software projects.

TECHNICAL SKILLS

Cloud

Microsoft Azure, AWS

Containers & Orchestration

Kubernetes, Azure Kubernetes Service (AKS), Docker

Infrastructure as Code

Terraform, Terragrunt

CI/CD & GitOps

GitHub Actions, FluxCD, GitOps, Jenkins

Observability

Prometheus, Grafana, OpenTelemetry / OTel Collector

Scripting, Automation & Database

Bash, PowerShell, Python, PostgreSQL, NoSQL

Operating Systems & Tools

Linux, Git, Azure CLI, AWS CLI

Networking

Azure VNet, Subnets, NSG, DNS, Load Balancing, Kubernetes Networking, Cilium, Gateway API

Identity, Security & Secrets

Microsoft Entra ID, Azure RBAC, IAM, MFA, Managed Identities, Service Principals, OIDC, Azure Key Vault, External Secrets Operator (ESO), Kubernetes RBAC, Kubernetes Secrets,

CERTIFICATIONS

Google Cloud Digital Leader

Dec 2024

Microsoft DevOps Engineer Expert (AZ-400)

In progress (exam planned 11.2026)

Microsoft Azure Administrator (AZ-104)

Currently preparing

LANGUAGES

Polish — Native

English — C1

HOBBY

- Gym (bodybuilding)
- Community creation
- Content creation
- Running
- History
- Tech
- Classic Menswear

EDUCATION

Master's Degree in Management

Kozminski University, Warsaw

2024–2027

Bachelor's Degree in Computer Communication

School of Form / SWPS University, Warsaw

2020–2024

IT Specialist

Technical High School, Września

2014–2018

COMMUNITY & CONTENT

Cloud & DevOps Community Organizer - Organize in-person Cloud/ DevOps meetups focused on knowledge sharing and networking within the Polish technology community.

Technical Content Creator - Create educational content about Cloud and DevOps across YouTube, TikTok and podcast formats.
